

Update Bolivia Aug 21 2021

Greetings,

Last night I was thinking most of us have put puzzles together. You open a box of pieces, you look at the photo of what it is and one begins usually putting the borders together.

Life has its puzzling moments, nothing new here! The Bible reminds us over and over again the righteous walk by faith and not by sight. It's hard to put a puzzle together without seeing the photo of what it is. They do make puzzles without photos but that must be a challenge without a reference.

We arrived with our last puzzle all mixed up again. We had it together and we knew where all the pieces fit. Now it once again needs to be put back together so we know which way things will go in a new environment.

Does walking by faith ever change? No! And a little change is always good as we can re-examine the pieces and see if we have them in the right place. One thing about putting a puzzle together is all pieces have their place.

There is usually information on the puzzle box; the size of the puzzle, how many pieces, and the funny part is the age of a person who could put this together. Usually we like a range group of 5-8 year old. So we know it will generally take 5-8 years to put the puzzle together! We have been at this puzzle for about ten years and now we are relocating the puzzle and putting it back together.

You know that feeling when you put the last piece in place? It's like you've seen the whole 5-8 years pass before your very eyes. We are getting to that point real soon. All the cables are plugged in, extra monitors are up and I a good cup of coffee on a desk with lots of room.

1. Goal number one, getting carnet taken care of! Done, in a week I should have a new one in hand. One huge puzzle piece in place!
2. Goal number two I just spoke about getting reset up for recording, editing and fellowship around the table. I am at about 80%

You know the feeling when that last piece is in place!

Lord bless you all as your pieces for today's challenge come together,

Bruce from the new room,  
I need to have a new name for this room!
